

*Raising the standards in
the WORLD OF ENERGY*

Texas Development /Joint Venture Project

Standard Oil Company USA Inc has entered into a Joint Venture with Home Creek Energy of Smyer Texas.

The purpose of this agreement is to grant Standard Oil Company USA the rights to purchase from Home Creek Energy the following Oil Leases located in Haskell and Kent Counties of Texas.

There are 14 leases in total covering approximately 2,500 acres and 30 currently producing wells. Most of the wells were drilled in the late 1980's and are in need of rework to include mitigation of the current formations that each well has produced over the years.

Upon completion, this project will enable Standard Oil Company USA to drill new wells in addition to the currently producing ones thus increasing our daily production.

About Standard Oil Company USA, Inc.
